PROJECTS

Jotes - Auto Job Tracker & Resume Analyzer (Web App + Chrome Extension) Extension | Live

Developed and launched a full-stack job application assistant with a Chrome extension to automatically track applications from LinkedIn, Naukri, and Indeed, and analyze resumes with actionable feedback.

Published and approved on the Chrome Web Store, enabling real users to install and use the extension. Integrated payment gateway and designed end-to-end workflow from tracking to resume improvement.

empowHER - Women Empowerment Platform GitHub | Live

Built and deployed a responsive React-based platform during a 72-hour hackathon focused on women's health, career support, financial literacy, and community resources. Designed modular component architecture with scalable structure and mobile-first responsiveness.

Cinemaah-Scribbles - Full Stack Movie Diary Web Application GitHub | Live

Developed and deployed a full-stack web application with secure admin-only access for managing movie entries. Implemented CRUD operations, integrated TMDb API for movie search, and used PostgreSQL for data persistence. Deployed the application on Render with a custom domain.
